PERSONAL INFORMATION

Date of birth: 09|11|2004;
Gender: Male
Father's Name: Dipesh
Mother's Name: Beena
Languages Known: English, Hindi, Marathi and Gujarati
Hobbies: Table Tennis, Squash
Linkedin:
linkedin.com/in/prathamudeshi

PROFILE SUMMARY

B.Tech Computer Engineering student at K.J. Somaiya (CGPA 8.9) with hands-on experience in development of LLM and GenAI tools, and full-stack development. Developed industry-grade projects such as an LLM Guardrails framework at Godrej and a real-time cyber threat map at DeepCytes. Skilled in Python, JavaScript, React, Node, and Django. Passionate about leveraging technology to address real-world challenges. Recognized consistently in national hackathons and design competitions for innovative and impactful solutions.

EDUCATION

- B. Tech Computer Engineering and Honours in Cyber Security in 2022-2026 batch from K J Somaiya School of Engineering with CGPA 8.9
- HSC in 2022 from KJ Somaiya College of Science and Commerce.
- 10th class from SVDD School, 2020 - 92.8%.

TECHNICAL SKILLS

Programming Languages:
- Python, C/C++, JavaScript, TypeScript, SQL

Web & Full Stack:
- HTML, CSS, React, Node.js, Django, Next.js

Tools & Frameworks:
- Figma, Flutter, Three.js

Other Socials

- **Portfolio:** prathamu.com
- **GitHub:** https://github.com/prathamudeshi

OTHER DETAILS

Internship:

- **Godrej Enterprises:**
  Data Science Intern June 2025 – July 2025
  - Designed a full LLM security Guardrails from scratch capable of **blocking advanced jailbreaks beyond GPT's default filters**.
  - Utilized techniques like Regex-based pattern matching, Semantic filtering and LLM-as-a-critic to make the system full-proof.
  - Implemented **comprehensive analytics** and reporting tools to monitor system performance, identify vulnerabilities, and drive continuous improvement in LLM safety.
  - Benchmarked on industry safety standards; collaborated with domain experts across all fields.
- **Deepcytes:**
  Project Leader March 2025 – May 2025
  - Engineered a real-time cyber threat visualization system capable of processing **10,000+ data points/sec** using optimized streaming pipelines.
  - Developed a scalable backend that collects and processes thousands of data entries per minute, applying clustering and other techniques to efficiently stream data to the frontend.
  - Built a responsive and information-rich frontend that visualizes global live attacks across multiple countries in real-time.
- **Expert SCM:**
  Project Leader Oct 2024 – Dec 2024
  - Built a dynamic supply chain management simulation game using **real-world logistics logic** and animations.
  - Overcame the barrier between supply chain management process and tech, merging them to help students learn the concepts.
- **Coding Judge:**
  Frontend Developer Intern July 2024 – Aug 2024
  - Improved performance by **implementing lazy-loading, debouncing, and memoization** preventing crashes and reducing perceived latency to near-instant levels.
  - Delivered under tight deadlines while mentored by **Microsoft SDEs and IIT-B peers**.

- **KJ Somaiya (In-house Internships):**
  - **ProCompiler:**

    Full Stack Developer Intern/ Project Leader Dec 2023 – Aug 2024
    - Developed a compiler used to conduct coding examinations supporting multiple languages including Python, C/C++, and Java.
    - Rewrote architecture twice to optimize performance and improve usability and features
  - **ProctConnect:**

    Frontend developer Intern July 2023 – July 2024
    - Created a centralized portal for 5,000+ users enabling communication between proctors, students, and faculty.
    - Scaled backend infrastructure to support live academic monitoring.

Positions & Responsibility Undertaken in KJSCE:

- **Project Lead**, ProCompiler @ KJSCE – Led development of exam-safe multi-language compiler.
- **Intern**, ProctConnect @ KJSCE – Supported development and release cycles of student management portal.

Projects:

- **IGNITE-WEB | EDTECH | AI**
  - Built a platform that transforms user **prompts into production-ready, editable websites** using prompt-to-code generation.
  - Added support for **runtime editing**, allowing users to customize layout, text, and styling live, bridging the gap between code generation and design control.
  - Focused on **AI prompt structuring**, mapping natural language to web layout logic.
- **HOSTKAR (Vercel Clone) | DEVOPS**
  - Developed a **CI/CD web platform** where users can deploy static and dynamic sites by simply pasting a GitHub repo link.
  - Introduced backend deployment principles using **Node.js**, **Express**, with automatic build and hosting.
- **STOCK-SCOPE | FINTECH**
  - Provided detailed stock stats, live charts, and portfolio insights with real-time data visualization.
- **ROOMERS | SOCIAL MEDIA**
  - Developed a beginner chat app with AJAX-based real-time messaging, emoji/GIF support.
- **Prompt-Search**
  - Solved hallucination in LLMs using auto-enhanced query generation and Google CSE integration.
- **Flight Booking System Frontend – Freelancing**
  - Built frontend for a flight booking system.
- **Web Data Extractor – Freelancing**
  - Built a tool to extract data from 99 acres.

Extra Courses / Certifications:

- Generative AI with Large Language Models.
- Prompt Engineering for ChatGPT.
- Roman Architecture.
- Learn to Program: The Fundamentals.

Interests / Extracurricular Activities:

- Hackathons, squash, table tennis, cycling, video editing, singing/acting
- Passionate about building impactful tech solutions with high scalability

Awards & Recognitions:

- **1st place** in tech competition organized by Indian Society for Technical Education (ISTE) KJSCE.
- **1st place** in Figma design competition by Friends of Figma (FOF) Mumbai
- Ranked **top10** in the LLM hackathon at IIT-Bombay.
- **Finalist** in national-level coding competition (Crackathon)
- **2nd** place in State-level math competition.
- **3rd** place in Office Table tennis Tournament.

Key Achievements:

- Some of the best contacts and relations in the industry.
- Balancing 2 internships and academics simultaneously.
